KORKO
selection®

BEYOND PREMIUM

The Korko Selection results from the most careful selection of household design objects. Inspired by contemporary design in which elegance is allied with function and aesthetics is combined with practicality, this collection is harmoniously integrated into the day-to-day life of a home. Ranging from kitchen utensils and tools to items that simplify routines, all Korko Selection products stem from a unique process striving to attain the perfect object. All the Korko Selection products are designed in an imaginative and responsible manner due to the main raw material being cork, which is a reusable and recyclable 100% natural material. Thus, this combination of cork and other materials inspires a unique collection of exclusive design objects that will suit your house to perfection. Discover the true meaning of the expression '**beyond premium**'.

ABOUT CORK

Cork is the outer bark of the cork oak tree, Quercus Suber L, a species natural to southwest Europe and northwest Africa, an area covering practically 2.7 million hectares in extent. The cork oak is a slow growing tree that may live for 200 years, which allows it, on average, to be stripped 16 times over the course of its lifespan, making cork a truly inexhausible natural resource. The first harvest takes place only when the tree turns 25 years old, and then every subsequent 9 years. Highly skilled men wielding special axes apply traditional skills dating back many hundreds of years to strip away the tree's bark. Cork is harvested on a sustainable basis and does not harm the tree in any way. The bark grows back completely while taking on a smoother texture after each harvest.

Cork is a material with many long treasured properties. It has a unique cellular structure that cannot be technologically replicated. Some 50% of cork is captive air, which results in excellent buoyancy, compressibility, elasticity, a high degree of impermeability to both air and water and low thermal conductivity, which also makes it a great insulator.

ABOUT SUSTAINABILITY

Korko Selection is a brand belonging to Amorim Cork Composites, an Amorim Group business unit, the world leader in cork production, with a history stretching back to 1870. The Corticeira Amorim track record has thereby long since been characterised by the adoption and strengthening of business practices geared toward sustainable development. In addition to processing a 100% natural and recyclable product, by harvesting cork bark without cutting down trees, the company actively contributes to the preservation and viability of cork oak forests, both in Portugal and abroad. The cork oak tree plays a key role in capturing CO^2, in preserving biodiversity and in combating desertification.

In 2009, the group won the European Commission's Motor Challenge Program due to its sustained energy efficiency improvements. The changes implemented have prevented the emission of 238 tons of CO^2 per year and contributed to a decrease in energy consumption. Our certifications also demonstrate our continuous commitment and effort towards establishing better practices. Indeed, we were the first cork industry company to be FSC (Forest Stewardship Council) certified.

MAGNETIC
SQUARE

If the pot is hot, there is nothing to worry about. We have created Magnetic, the perfect duo of hot pot stands. As the name suggests, both MAGNETIC SQUARE and MAGNETIC ROUND have two magnets insert on their surface, which allows you to fix them to the pan, thus making it much safer to use.

DESCRIPTION

MATRYOSHKA
FEVER

Cork is a wonderful insulator and it is this characteristic that makes it such a common hot pot stand option for hot objects. Thus, besides incorporating the material's special properties, we have decided to include an additional feature which ensures that MATRYOSHKA FEVER is a unique hot pot stand as it also serves as a tray. Furthermore, by adding various and different diameters to its inner section, we guarantee the support provided to pots of all sizes. Therefore, you are now able to elegantly transport all hot recipients from your kitchen to your chosen place of serving and dining, with just one single object.

DESCRIPTION
Tray + Hot Pot Stand

DIMENSIONS
28,5 x 4,5 cm; 11.2 x 1,8 in

MATERIALS
Agglomerated Cork

DUPOND
& DUPONT

The DUPOND & DUPONT is a hot pot stand that quickly transforms into two. Made up of two equal sections that combine to form a unique support, the Dupond & Dupont may therefore be used as one or two supports, depending on your needs. There's nothing else quite like it.

DESCRIPTION
Two-in-One Hot Pot Stand

KEEP
IT COOL

KEEP IT COOL is a wine cooler made from agglomerated cork and ceramic and is cool for various reasons. Besides fulfilling its core purpose, keeping the wine cold due to the properties of cork as a perfect insulator, the design provides a current take on Portuguese ceramic traditions. There is also a place for a cork stopper should you wish to close your bottle again and thereby ensuring the wine retains its original properties. Cool!

DESCRIPTION
Wine Cooler

DIMENSIONS
18 x 27 cm; 7,1 x 10,6 in

MATERIALS
Earthenware and Agglomerated Cork

DR. HOUSE

This is the modern office organiser. You can pin to it all those reminders and pieces of paper with information you don't want to lose, store business cards or throw in your pen and pencil. As they might say, a little organisation everyday keeps the doctor away. But this doctor is here to help.

DESCRIPTION
Memo - Desk Organiser

DIMENSIONS
12 x 12 x 14 cm; 4,74 x 4,75 x 5,5 in

MATERIALS
Agglomerated Cork

MR.
BUTLER

MR. BUTLER is a bottle storage solution that is always at your service. Made from cork leather, a combination of agglomerated cork forming a very resistant support structure, this is the perfect solution for organising your wine collection. Each of the supports holds up to 25kg, much more weight than a bottle of wine. Bring MR. BUTLER into your home and let him serve you to perfection.

DESCRIPTION
Wall Mounted Wine Rack

DIMENSIONS
20 x 53 cm; 7,9 x 20,9 in

MATERIALS
Cork Leather
